### **DETAILED ACTION**

1. Claims 1, 4-19, and 22-40 are allowed. These claims have been renumbered as claims 1-36.
2. Claims 2, 3, 20, and 21 have been cancelled.

### ***Information Disclosure Statement***

3. The information disclosure statement filed January 15, 2009 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each cited foreign patent document; each non-patent literature publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered.

The applicant has not submitted a legible copy of foreign patent document **WO 9715883, Publication Date: 1997/05/01, Patentee or Applicant: Viewsoft Inc.**

### ***EXAMINER'S AMENDMENT***

4. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in an interview with Kenneth Eiferman on October 6, 2008.

5. Claims 4 and 34-40 have been amended as follows:

4. (Currently Amended) The system of claim 2 1, wherein the first binding statement is associated with a first priority and the second binding statement is associated with a second priority.

34. (Currently Amended) The computer-readable storage medium of claim 33, further comprising computer-executable instructions for indicating an execution order for the collection of binding statements.

35. (Currently Amended) The computer-readable storage medium of claim 34, further comprising computer-executable instructions for specifying that the collection of binding statements comprises a first binding statement associated with the first data element and a first execution order indicating a highest priority and a second binding statement associated with the second data element and a second execution order indicating a second highest priority.

36. (Currently Amended) The computer-readable storage medium of claim 35, further comprising: computer-executable instructions for evaluating the first binding statement and in response to determining that the first binding statement evaluates successfully, executing the first binding statement.

37. (Currently Amended) The computer-readable storage medium of claim 36, further comprising computer-executable instructions for updating the target with a value of the first data element.

38. (Currently Amended) The computer-readable storage medium of claim 35, further comprising computer-executable instructions for monitoring the first data element and the second data element for a change notification and in response to detecting the change notification, re-evaluating the collection of binding statements.

39. (Currently Amended) The computer-readable storage medium of claim 35, further comprising computer-executable instructions for determining that the first binding statement does not evaluate successfully, and in response, evaluating the second binding statement.

40. (Currently Amended) The computer-readable storage medium of claim 39, further comprising computer-executable instructions for evaluating the second binding statement and in response to determining that the second binding statement evaluates successfully, executing the second binding statement.

### **REASONS FOR ALLOWANCE**

6. The following is a statement of reasons for the indication of allowable subject matter:

The prior art of record does not render obvious to one ordinarily skilled in the art at the time of applicant's invention nor anticipate the combination of claimed elements including "a binding engine executing on the computer, the binding engine establishing a priority order in which the plurality of binding statements are to be executed by the computer in order to bind the target to the source, the execution priority order being established using a priority indicator or marker associated with each of the plurality of binding statements, the binding engine evaluating the plurality of binding statements to determine content to be displayed in a user interface during execution of the user interface software by the computer" as recited in independent claim 1 and similarly recited in independent claim 19.

As per claim 33, the prior art of record does not render obvious to one ordinarily skilled in the art at the time of applicant's invention nor anticipate the combination of claimed elements including "mapping a target to at least a first data element and a second data element of a plurality of data elements of a source using a collection of binding statements used to determine content to be displayed in a user interface during execution of user interface software by a computer, the plurality of binding statements in a declarative markup language, wherein the collection of binding statements are provided during program development of a user interface."

The remaining claims, 3-38, 22-32, and 34-40, are dependent claims, thus these claims are patently distinct over the art of record for at least the above reasons.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
